PROJECT DESCRIPTION
EAST BAY MUNICIPAL UTILITY DISTRICT
MAIN WASTEWATER TREATMENT PLANT
CLARIFIER REHABILITATION PHASE 4
(SD-459)

Overview and Background

The East Bay Municipal Utility District's (EBMUD) Main Wastewater Treatment Plant (MWWTP) clarifiers separate biomass from the treated secondary effluent to protect environmental health and comply with regulations. Floatable scum is skimmed away from the water surface while settled sludge is removed from the bottom of the tank. The MWWTP Clarifier Rehabilitation Phase 4 Project (Project) will replace existing mechanical equipment and resurface concrete. The improvements address life and workplace safety and process reliability to minimize risk to workers, the public, and the environment.

Project Purpose and Objectives

This project will perform work on the clarifiers at the MWWTP. This project will strengthen existing structures and replace aging equipment in order to support operational needs.

Project Location

The Project is located at the MWWTP at 2020 Wake Avenue in Oakland. All work will be completed within the existing MWWTP facility on EBMUD property. Refer to Figure 1 for the project location.

Project Characteristics

The scope of work includes the following improvements on the clarifiers at the MWWTP:

- Replace existing equipment
- Resurface concrete

Permits and Approvals

No permits are required for the Project because all work will be performed on EBMUD's MWWTP property and the Project scope of work is limited to repair, replacement, and/or minor alteration to an existing wastewater facility.

Public Considerations

The MWWTP is on private property and located at least 2000 feet away from residential or commercial areas. Impacts to the public from construction activities will be minimal.

Schedule and Work Hours

Construction is scheduled to begin in January 2025. The estimated construction duration is approximately 12 months. Regular construction work hours will be 7:00 a.m. to 7:00 p.m., Monday through Friday.
