## PROJECT INFORMATION

1. **TITLE:** Pipeline Infrastructure Renewal Project
2. **LOCATION:** (City, County, and specific location)  
Contra Costa County-Variou sites throughout Contra Costa County. See Figure 2 and Tables A and B.
3. **DESCRIPTION:** Replace and repair deteriorated pipelines as needed for cost effectiveness. These projects will typically replace water pipelines in kind.

## EXEMPTION FINDING (Check one)

This project is exempt from CEQA because:

1. ☐ Activity is not a project
2. ☐ Activity is Ministerial (Sec.21080(b)(1); Guideline 15268)
3. ☐ Activity is a Declared Emergency (Sec.21080(b)(3); Guideline 15269(a))
4. ☐ Activity is an Emergency Project (Sec.21080(b)(4); Guideline 15269(b)(c))
5. ☒ Activity is Categorically Exempt Under Guideline 15302
6. ☒ Activity is Statutorily Exempt Under Guideline 15282
7. ☒ Reasons why project is exempt: This project will only repair, replace, or reconstruct existing utility systems and/or facilities with little or no expansion of capacity, pursuant to Sections 15302 and 15282 of the CEQA Guidelines.

## Pipeline Design

The District will design approximately 25 miles of pipeline infrastructure renewals in FY23. Projects will be selected from Table A, which includes replacement pipelines already in design or carried over from FY22.

Table A – Pipeline Infrastructure Renewal Design Projects in Contra Costa County, FY23

Street	City	Limits	Length (feet)

### Pipeline Construction

The District forecasts construction of approximately 22.5 miles of Pipeline Infrastructure Renewal projects in FY23. The District will select projects from Table B, which includes previously designed projects from the backlog and newly selected replacement projects. Projects in construction as of August 2022 are marked with a (†) in the *Street* column.

Table B – Pipeline IR Construction Projects in Contra Costa County, FY23

RECEIVED

MAR 15 2023

Office of the Secretary

**Attachment A**  
**Pipeline Infrastructure Renewals Project**

RECEIVED  
MAR 15 2023  
Office of the Secretary

**Project Description**

This project involves the replacement of deteriorated pipelines in EBMUD's service area. A summary and project listing of forecasted pipeline design and construction activity are presented in the attached Tables A and B for Contra Costa County. See these tables and Figure 2 for the complete list of locations in the county.

**Justification**

The pipeline candidates are selected for replacement when it becomes more cost effective to replace them than to make frequent repairs. This will also reduce the number of costly interruptions in water delivery.

**Permits**

Encroachment permits will be obtained from the appropriate cities as required.

For coordination with outside agencies, a listing of forecasted EBMUD's design and construction activities in paved streets, identified as the Fiscal Year 2023 Pipeline Work Plan, was circulated to all agencies in EBMUD's Service Area on August 24th, 2022. The Work Plan is an annual document that outlines anticipated pipeline design and construction activities in paved streets for the current fiscal year.

**Schedule**

Projects classified as being in design are those projects that are currently in design or may be designed in FY23 (July 1, 2022 to June 30, 2023). These projects may reach construction phase as early as this fiscal year. A project listing of forecasted pipeline design activity is given in Table A.

A project listing of forecasted pipeline construction activity is given in Table B. Projects classified as being in construction are those projects that have been designed and are waiting for a scheduled construction start date. EBMUD seeks to maintain a construction backlog from which projects can be selected for construction in a cost-effective manner. Many of the projects listed in the following tables will be constructed in FY23. Projects that are not built in FY23 will carry over to subsequent years in the construction backlog.

**Operational Impact**

Implementation of this project will not affect the operation of EBMUD's water system. These projects typically replace water mains in kind (i.e., same routing, but may include nominal size increase). Construction will take place with the existing pipelines still in

RECEIVED

MAR 15 2023

Office of the Secretary

service. Minimal interruptions in water service will occur for short periods of time when the new pipeline is connected to the existing pipeline.

### **Public Impact**

EBMUD will minimize disruptions, in particular, traffic impacts, related to the pipeline replacement. Appropriate traffic control measures will be implemented during the construction. Driveways will remain accessible, and one way traffic will only be used adjacent to excavation pits and pipe assembly areas. In order to minimize delays, at least one lane of traffic will be maintained, and two-way traffic will be maintained whenever feasible.
